1954 INDEX TO THE OIL AND GAS JOURNAL

Published at Tulsa, Oklahoma

Special Numbers

Review-Forecast Number	January 25
Refining Number	March 22
Exploration Number	April 19
Field Processing Number	April 26
Texas Number	May 24
Midyear Review and Outlook Number	July 26
Pipeline Number	September 20
Drilling Contractors and Equipment Number	October 11
Pre-A.P.I. Number	November 8
A.P.I. Number	November 15
International Number	December 27

Contents of Index

Technical Articles on Engineering And Operating Subjects

Drilling	Page 3
Production	Page 7
Refining	Page 11
Petrochemicals	Page 17
Pipeline	Page 19
Natural Gas	Page 22
Natural Gasoline	Page 23
Exploration	Page 25
Technical Reprints	Page 61
Technical Books	Page 62

General News, Shaping Industry Policy and Operations

Industry Affairs	Page 28
Government	Page 30
Trade Associations	Page 32
States—Developments	Page 34
Foreign	Page 38
Maps	Page 43
Personalities	Page 44

The List of Men Who Wrote for The Journal During 1954:

Authors	Page 45

INDUSTRY-WIDE SCOPE—WORLD-WIDE COVERAGE
"Follow The Journal...and You Follow the Oil Industry"

the OIL AND GAS JOURNAL — 1954 INDEX

Technical Articles on Engineering and Operating Subjects

Drilling

ACTIVITY, DRILLING (U. S.)

	Date	Page
Williston Finds 1953 a Year of Steady Development—John C. McCaslin	1- 4	128
New Pays Stimulate Hamilton Dome Production—Joseph A. Kornfeld	1-11	84
New Louisiana Deep Field Discovered	1-25	106
Strike Extends Newcastle	1-25	109
Shell Rig 20 Set Some Unusual Marks	2- 1	38
Independent Completes One Richfield, Two Dundee Pays	2- 1	40
Rank Wildcat Is Indicated Lower Tuscaloosa Producer	2- 1	54
Evidence Indicates Maxie, Pistol Ridge Are One Field	2- 8	69
Shell Recovers Oil, Gas-Cut Mud From Black Mesa Well	2- 8	70
Sun Wildcat Successful	2-15	96
Louisiana Strike Report	2-15	96
Utah Wildcat Finds Oil	2-15	104
Wildcat Gets Oil Show	2-15	105
North Carolina Test Spudded	2-15	105
Dade County Test of Gulf Finds 22°-Gravity Crude	2-22	125
Fast Drilling in Highly Faulted Sands—Joseph A. Kornfeld	2-22	188
1,000th Well Completed in the Naval Petroleum Reserve No. 1	3- 1	43
Drilling Along the Wichita Mountain Front—Joseph A. Kornfeld	3- 1	89
Lewis Creek, Colorado—Where Digging Is Fast and Easy—Joseph A. Kornfeld	3- 8	116
Oklahoma's Lincoln County in Limelight—John C. McCaslin	3- 8	158
Mission Canyon Production Indicated in Brorson Area	3-15	85
Winter Drilling in the Williston Basin	3-15	118
Nevada Strike Highlights February News—John C. McCaslin	3-29	166
Rockies' Most Concentrated Drilling Program	4- 5	166
Union Oil Discovery Opens Major South Louisiana Field	4-12	106
13,313 Wildcats Probe for New Oil—Frederic H. Lahee	4-19	151
Three Discoveries Spur Search for Pennsylvanian Oil in Hugoton Embayment—John C. McCaslin	4-19	252
Stanolind Wildcat in Lea County Flows Oil on Test	5- 3	64
Buffalo Gets Flow of 920 Bbl. From Strawn Wildcat	5-10	71
Pictured Cliffs Gas Well Extends Field 12 Miles	5-10	86
Gulf Resumes Deep Test	5-17	73
Magnolia Testing Apparent Anadarko Basin Discovery	5-17	89
Phillips Wildcat on Million Acre Block Dry	5-24	125
Texas Drilling—A Study in Contrasts—Ed McGhee	5-24	155
Magnolia Finds 800 Ft. of Pay in Eugene Island Test	5-31	48
Third Producer, Deep Pay Zone Found in Texas Field	5-31	50
Phillips Gets Big Gas Flow From Pictured Cliffs Sand	5-31	52
Gaines Devonian Looks Good	5-31	56
Hugoton Gets Top Exploration Billing—John C. McCaslin	5-31	134
Deep Drilling Can Boost Pennsylvanian Oil Supply But It's Costly and There's Plenty on Hand Already	6- 7	60
Weeks Island Wildcat to Test in Shallower Zone	6- 7	61
Two Strikes Boost Activity in Edwards Plateau Area	6- 7	77
75 Rigs Active in One Pennsylvania Gas Field—Carl H. Roberts and Thomas D. Hessin	6- 7	154
Magnolia Offshore Test Nearing	6-14	104
New Major Producing Area of South Louisiana Seen	6-14	104
Monterey's Island Venture Already Is Below 4,000 Ft.	6-14	109
Ranch Area Promising—Carl Hoot	6-21	110
Montana Land Board Orders Montana-Dakota to Start Wells Within 30 Days or Lose Leases	6-21	127
Texas Offshore Drilling: First Well Drilling in U.S.-Owned Waters—William P. Sterne	6-21	152
Falcon Seaboard Plans Deep Test in West Virginia—Neil Williams	6-28	79
Montana-Dakota Asks for Hearing on Lease Threat	6-28	85
Ranch Hopes Get Boost—Carl Hoot	6-28	88
Andrews County Area Has Second Ellenburger Well	7- 5	96
Gas Line Approval Boosts San Juan Basin's Activity	7- 5	100
Sulfur Is New Target in Humble's 20-Well Offshore Drilling Program—William P. Sterne	7- 5	101
Good Pays, Sure Profits, Lure Drilling to Texas' Cambrian Trend—Norman S. Morrisey	7-12	90
Mississippi Test Passes Two Pays in Lower Cretaceous	7-19	78
Nemaha Well Swabs 480 Bbl. Daily—Ready for Pump	7-19	78
Northwest Montana Wildcat Play Sparked by Banff Oiler—Norman S. Morrisey	7-19	156
Mississippi Gets More Promising Oil Shows	7-26	138
Important Strikes End First Half—John C. McCaslin	7-26	360
Mississippi Strike Flows Up to 748 Bbl. Per Day	8- 2	55
Big Polecat Well Running Casing in 100 Ft. of Pay	8- 2	62
Wyoming Wildcat Hits	8- 2	63
Mississippi Well Testing Shallow Oil, Gas Showing	8- 9	69
Deep Delaware Basin Well Tests Dry Ellenburger Gas	8- 9	79
Humble Proves Louisiana Tidelands — William P. Sterne	8- 9	89
High-Gravity Flow Is Best Texas Panhandle Recovery	8-23	104
Stanotex Plans Wildcat to McMullen County Midway	8-23	104
Well on Basin's East Side, 20 Miles From Production	8-23	107
Curtis Sand Development Stimulates Drilling at Grass Creek, Wyoming—Joseph A. Kornfeld	8-23	204
Wildcat Off Texas Coast Will Drill From Platform	9- 6	70
Active Drilling Area New Pipelines Assure Denver-Julesburg Expansion—C. O. Willson	9- 6	103
Continental Well in Zone Which Blew Out in Bell Lake	9-13	99
Mississippi Wildcat Completion Marks State's First Strike in Paluxy Sands	9-13	110
Pipeline Spurs Drilling	9-27	59
Ellenburger Strikes Fire West Texas—Frank J. Gardner	9-27	157
Rockies Lead the Discovery Race—John C. McCaslin	9-27	158
Key Dora Roberts Test Hits	10- 4	107
Amerada Gives North Dakota Seventh Productive County	10- 4	111
Tests Show 107-Ft. Section in West Texas Pan Am Well	10- 4	119
Midland Independents Make Important Strike—Carl Hoot	10-11	102
Monterey Brings in 300-Bbl. Producer Off Seal Beach	10-11	107
Rockies Gets 3,009 Wells in First Three Quarters	10-11	116
Drilling Records Toppling in 1954—Norman S. Morrisey	10-11	153
Rockies Move Into "Major Province" Status	10-11	153
California Footage Record Holds But Completions May Drop—D. H. Stormont	10-11	158
Texas Drilling Up 10 Per Cent Over 1953	10-11	160
Shallow Drilling Revives Activity in North Louisiana	10-11	164
South Louisiana Sure of Long-Term Drilling	10-11	165
Bits Seek Rich Offshore Production	10-11	167
Mid-Continent Still in Forefront of Nation's Busy Areas	10-11	168
Steady Drilling Continues in Areas East of Mississippi	10-11	174
Here Are the Drilling Reports	10-11	182
West Texas Still Hot—Carl Hoot	10-18	79
Test Might Become First Johnston County Producer	10-18	84
Shallow Pay Spurs Osage Drilling—Norman S. Morrisey	10-18	166
Palo Duro to Be Tested	10-25	80
Drilling Expands on Nesson Anticline—Norman S. Morrisey	10-25	118
Arizona Is Added as Thirtieth Producing State	11- 1	58
Key Gas Strike Made	11- 1	68
Beaver County Busy After Long Lull	11- 8	118
Shell Has Strike in Utah	11-15	165
Texaco Finds Ellenburger 8 Miles North of Odessa	11-15	168
Ellenburger Test Completed as Discovery in Fusselman	11-22	67
Fifth Frio County Chalk Tested	11-22	69
Western Kansas Wildcat Hits New Producing Zone	11-22	71
Strawn Pinchout Sparks Drilling at Jameson—Norman S. Morrisey	11-22	108
Water Headaches Plague Greenwood Drilling—R. T. Widney	11-22	148
Total October Completions, Exploration and Development and the Month's Wildcats	11-29	138
Active Drilling Operations	11-29	140
Sands, Once Bypassed, Make Oklahoma Area Hottest in Nation—Norman S. Morrisey	12- 6	76
Lake Arthur Active	12- 6	96

	Date	Page
Well Could Give Colorado Another Producing County	12- 6	97
Strike Indicated in Colorado Capital	12-13	93
"Failure" Produces in Gregg County	12-13	98
November Adds New Oil Basin—John C. McCaslin	12-27	297
Sioux to Expand	12-27	111
Southern Production Will Extend Canadian Program	12-27	112
Hunt Oil Plans 18,000-Ft. Rank Pecos County Wildcat	12-27	113
Forest Will Test Pecos	12-27	113
Townsite Field Defined—William P. Sterne	12-27	115
ACTIVITY, DRILLING (FOREIGN)		
Sicily Well Tested—Gulf Plans Second Near Ragusa	1-25	116
Bonuses Paid for Pembina Leases in Alberta's Latest Sale Indicate Field Regarded Optimistically as Big Reserve	2- 8	71
Desert Search Pushed to Start Intensive Exploration Program on Conorada Concession	2-15	106
Douglas Starts Second Well	2-15	114
Union Spuds Sechura Test	2-15	114
Rig Shipped for Test	3- 8	79
Lake Exploration Slated at Windsor	4-12	106
Active Rigs Hit Record—Dahl M. Duff	4-26	130
Wafra's Drilling, Development, and Shipping System	6-28	98
New Show in Australia	7- 5	115
Four Wildcats Hit	7-12	75
Light-Gravity Crude Tested at Wildcat South of Pembina	8- 2	70
Eastern Australian Venture to Be Spudded in 2 Months	8-23	112
Bavarian Wildcat May Open New Oil Province	9-13	103
Aggressive Drilling in Canada Awaits Suitable Markets	10-11	178
British Columbia's First Commercial Discovery Made	12- 6	78
Pembina Picks Up	12-27	112
BARGES (see Offshore)		
BITS (see Equipment; Practices)		
CASING		
How Casing Was Run on World's Deepest Producer—D. H. Stormont	7- 5	129
CEMENTING		
A.P.I. Study Focused on Effect of High Temperatures and Pressures on Cements—M. A. Swayze	8- 2	103
How to Cement Big Pipe—William W. Ball	11-22	86
COMPLETIONS (General and Multiple)		
New Fracturing Idea Is Gun Perforator Blasting a Bullet Around a 90 Corner Into Formation—Kenneth B. Barnes	2-22	108
Hydraulic Fracturing Improves Producetion—J. K. Henderson, J. A. Harmon, and W. B. Harley	2-22	162
Fracturing Boosts Red Fork Sand Production—Arthur Stegelman, Jr.	2-22	166
Latest in Fracturing Equipment Goes to Work (Picture)	3-15	80
New Fracturing Ideas Using Viscous Treating Mixture Causes Vertical Fractures, Promises Higher Output—Kenneth B. Barnes and Edwin McGhee	3-22	116
Fracturing Report—Model Studies Show What Can Be Expected From Treatments	4- 5	65
Selecting Well-Completion Methods—Harold M. Dunson and J. E. Eckel	5- 3	102
Shallow-Sand Boom Due to Fracturing in 31 Counties	5-10	66
Larger Fracturing Jobs Bring Larger Pumping Equipment—Ed McGhee	5-17	101
When Do Dual Completions Pay?—Marshall C. Turner	5-17	111
Multiple Fractures Can Increase Recovery—C. R. Fast	5-31	70
Three Oklahoma Fracturing Jobs—D. E. Shupp	5-31	73
Landing Casing in Shallow Wells—Scott E. Temple	5-31	92
Vertical Hydraulic Fracturing—Roscoe C. Clark, Jr., and Jack J. Reynolds	8- 9	104
Field Tests Show Advantages of Vertical Hydraulic Fracturing—Philip E. Bocquet, Russell W. Ankrom, Jr., and C. H. Hesser	8- 9	108
Light Crude Oil Successfully Fractures Massive Limestone—Monroe G. Cheney	8-16	132
Fracturing Ups Production in Acid-Soluble Formations by 200 Per Cent—George C. Howard	8-16	135
Fracturing Rejuvenates a Veteran Field—Wayne L. McCann	8-16	136
Permanent-Type Well Completions—C. B. Strauch, G. W. Atchley, and E. R. Daniel	8-23	129
For Best Results From Hydraulic Fracturing Use the Proper Fracturing and Sand-Propping Agents—W. E. Hassebroeck, Arthur Stegelman, Jr., and S. S. S. Westbrook	9- 6	109
Partners of Industry Perforating Companies Reach Maturity—James D. Hughes	9-27	98
Fracture-Packing Cures Sand Headaches—John D. Forsythe	10-18	101
Sand Control Successful From "Squeeze Pack"—Edwin McGhee	10-25	69
COSTS		
Cost-Cutting Huddles Explain Why We're Setting Records With Fewer Rotary Rigs—Ted A. Armstrong	10-11	100
What Discoveries Cost West Coast Operators During 1954	11-22	64
Cut Drilling Cost for a Profit—Robert J. Enright	11-22	66
DEEP WELLS		
Washover Pipe Recovered	1-11	65
Phillips' Bradley Well Sets Oklahoma Depth Record	7-26	139
Here's How British-American Plans Deep Wells	8- 2	98
Gulf Continues Deep Well	8- 9	79
Record Year for Deep Drilling and the Trend Will Continue—Frank J. Gardner	8-23	95
Deep Test Spudded on Venice Dome	8-23	104
Gulf's Wildcat Near Pecos Drilling Below 18,063 Ft.	8-23	104
Superior May Be Heading Toward New Depth Record	8-23	106
Terry County Well Testing 35-Degree Devonian Crude	8-30	56
New Louisiana Depth Record	10-25	77
Long Beach Airport Is Rival for Signal Hill—D. H. Stormont	11-22	63
Ohio Works Up Deep Hole	12-20	67
How They're Drilling at Rayne Field—William P. Sterne	12-20	89
Coastal Depth Record Set	12-27	116
DEEPENING (see Practices and Reconditioning)		
DIRECTIONAL: ORIENTED: WELL-BORE SURVEYS		
High-Angle Slant-Hole Drilling Under Corpus Christi's Ship Channel—Joseph A. Kornfeld	2-22	145
Drill Bits Thread Harbor Field—D. H. Stormont	3- 1	42
Amerada to Seek Permit for Slant Drilling in North Dakota's Hofflund Field	6-14	102
Tide Water Completes Well Under Louisiana Community	7-18	78
How They Drilled Houma 1 Community, the Longest Section of Deviated Hole Ever Drilled—J. E. Bailey	10-11	126
Drain Holes for Tired Old Wells—D. H. Stormont	10-11	144
DRILL PIPE (see Equipment; Practices)		
ECONOMICS (see specific headings)		
EQUIPMENT (also see Practices, other specific subjects)		
Novel Offshore Rig Drills Six Holes From Fixed Derrick—William P. Sterne	1-11	58
All-Electric Rig Drilling in Ventura Avenue Field—Martin Mears and Charles J. Manner	2- 1	64
New Instrument Obtains Nine Kinds of Bottom-Hole Data—D. H. Stormont	2-15	94
Automation in the Oil Fields—Kenneth B. Barnes	3- 8	58
This Mast Rolls on Own Wheels (Picture)	3-22	115
Shell Contracts With Glasscock for 5-Year Offshore Oil Search Using New Platform Idea—Willilam P. Sterne	4-26	125
Odeco Barge Finished—William P. Sterne	5-31	48
Sonic Drill to Be Tested on Chert in Different Field	6- 7	62
Field Use of Recording Sub Indicates Force of Bit Against Rocks Determines Drilling Rate, Instrument Society Told—G. L. Farrar	9-27	49
There's a Big Investment in Those Drill Collars . . . Here's How to Protect It—H. M. Rollins	10-11	137
They Come Big in California	10-11	143
Contractors Told How to Figure Drill-Pipe Wear—D. H. Stormont	10-18	74
Aluminum Derrick Goes to Work	11-15	163
A.P.I. Tubular-Goods Standards—H. W. Ladd	11-15	237
Pressure-Weld Technique for Stub-Ending Drilling Collars—J. L. Dickmann	11-29	67
What's New in Drilling Instruments?—E. L. Decker and F. S. Crane	11-29	80
What's the Life Expectancy of Your Drill Pipe and Tool Joints?—John Rhea	12- 6	125
A Quick Twist of the Wrist Fastens New Pipe Coupling	12-13	90
FISHING		
Ohio Oil Co. Continues Fishing Operations in Paloma Field	3-15	92
Paloma Fishing Continues	5-24	133
Good Fishing Tools Are Good Business—Ray F. Huber	10-11	129
Gulf Plugs Back Deep Well to Test Higher Formation	12-20	68
LABORATORY		
Carter's Expanded Labs Dedicated—Kenneth B. Barnes	11- 1	62
Human Brains Are Better—Cannot Be Replaced by Electronic Computers, Researcher Tells Institute—George Weber	12-20	72
MAINTENANCE (see Practices)		
MANAGEMENT		
Take This Test—Find Out Your H.R.Q.	8-23	131

	Date	Page
Bone Up on What Your Boss Wants to Know—Prof. Robert D. Gray	8-30	84
What to Be a Better Supervisor?	11-22	81
This Business of Handling People	12-20	82
MODERN DRILLING (A Series)		
Graphs Aid in Determining Mud-Pump Pressures	2-22	195
What Causes Lost Circulation?—J. M. Bugbee	3- 8	123
What to Do About Lost Circulation (Part 1)—J. M. Bugbee	3-22	228
What to Do About Lost Circulation (Part 2)—J. M. Bugbee	4- 5	125
What to Do About Lost Circulation (Part 3)—J. M. Bugbee	4-26	257
What to Do About Lost Circulation (Part 4)—J. M. Bugbee	5- 3	112
Drilling-Mud Pressure While Circulating—George S. Ormsby	5-10	183
Mud Pressures in Tripping With Drill Pipe—George S. Ormsby	5-24	267
Mud Pressures in Running Casing—George S. Ormsby	5-31	105
Effect of Hole Diameter on Mud Pressures—George S. Ormsby	6-14	147
Equipment and Techniques for Offshore Drilling—J. N. Pederson	6-28	131
Getting the Most Out of Mud Equipment (Part 1)—E. E. Huebotter, T. H. Dunn, and Frank Bell	7-12	113
Getting the Most Out of Mud Equipment (Part 2)—E. E. Huebotter, T. H. Dunn, and Frank Bell	7-19	125
Getting the Most Out of Mud Equipment (Part 3)—E. E. Huebotter, T. H. Dunn, and Frank Bell	8- 2	113
New Exploration Tool Aids Wildcat Drilling—Norman Morrisey	8- 9	119
New Methods of Hard-Rock and Jet-Bit Drilling—Henry B. Woods	8-23	163
Controlling Crooked-Hole Tendencies—H. B. Woods	9- 6	121
How Mud Pressures Affect Drilling Rate—H. B. Woods	9-13	149
Hints for Drillers Who Want to Stay Healthy—J. R. Yost	9-20	297
V-Belt Drives for Slush Pumps—1—William S. Worley	10-25	125
V-Belt Drives for Slush Pumps—2—W. S. Worley	11- 1	109
V-Belt Drives for Slush Pumps—3—W. S. Worley	11- 8	187
V-Belt Drives for Slush Pumps—4—William S. Worley	11-15	263
V-Belt Drives for Slush Pumps—5—William S. Worley	11-22	110
MUDS, MUD PRACTICES, and SYSTEMS		
Graphs Aid in Determining Mud-Pump Pressures	2-22	195
What Causes Lost Circulation?—J. M. Bugbee	3- 8	123
Oil-Base-Emulsion Drilling Fluids Offer Improved Completions and Economy—Charles C. Wright	3-29	88
Proper Mud Programs—Joseph A. Kornfeld	3-29	97
How Mud Properties Affect Drilling Rate	4-12	131
Mud Plugs Horizons	5-17	86
Use of Exhaust Gas Instead of Mud Gets Better Results in Northwestern Arkansas' Hard Rocks—Lower Cost Claimed—Ed McGhee	5-31	46
Drilling-Fluid Costs Too High?—E. E. Huebotter, T. H. Dunn, and Frank Bell	6- 7	114
Drilling-Mud Additives—Robert J. Enright	7- 5	141
A.A.O.D.C. Teaches Drilling-Mud Control	7- 5	141
A Brief Outline of Common Drilling-Mud Additives and Discussions of Some of Their Uses	7- 5	142
Getting the Most Out of Mud Equipment (Part 1)—E. E. Huebotter, T. H. Dunn, and Frank Bell	7-12	113
Getting the Most Out of Mud Equipment (Part 2)—E. E. Huebotter, T. H. Dunn, and Frank Bell	7-19	125
How to Use Bentonite-Diesel Oil Cement Mixtures to Restore Lost Circulation—P. P. Scott, Jr., J. L. Lummus, and G. C. Howard	8- 2	105
Getting the Most Out of Mud Equipment (Part 3)—E. E. Huebotter, T. H. Dunn, and Frank Bell	8- 2	113
Simple Addition Improves Old Mud Pumps	8- 9	113
Centrifuge May Point Way to Reduced Drilling Costs on Deep Wells—Ed McGhee	10-11	134
Field Control of Completion Fluids—D. L. Roberts	10-11	147
What the Drilling Man Should Know About Operation of Duplex Slush Pumps in Parallel—R. L. Walker and R. A. Tappmeyer	11- 8	154
New Drilling Fluid Passes Tests for Multipurpose Water-in-Oil Emulsion Mud—J. L. Lummus	12-13	106
Saturated Salt-Water-Emulsion Mud Solves Williston Problem—E. S. Huebotter, B. W. Emerson, and F. A. Scearce	12-13	109
Low-Solids Mud Prevents Hole Trouble—F. L. Gaye	12-13	114
Nonfluorescing Emulsion Drilling Fluid—D. L. Wilson	12-13	117
New Mud Dispersant Developed From Domestic Sources	12-13	134
OFFSHORE (also see PRODUCTION)		
Novel Offshore Rig Drills Six Holes From Fixed Derrick—William P. Sterne	1-11	58
One Answer to How to Profit From Offshore Operations	1-18	79
The California Co. Goes to Sea Again—William P. Sterne	1-18	80
Wells Are Cheaper by the Half Dozen	1-18	83
Noble Flanges Up One Well, Spuds in Next	1-18	88
Test Erection of Derrick Made Before Barging to Location	1-18	89
Drilling Record Set at Weeks Island—William P. Sterne	1-18	113
Drilling Program Announced for Wilmington Field	1-25	109
Portable Rigs in Design Stage Will Drill in 60-Ft. Water—Henry D. Ralph	2- 8	92
Even the Drilling Equipment Goes Under—William P. Sterne	2- 8	96
Drilling Rights Sought in Santa Monica	2-15	105
Newest Drilling Barge Has . . . "Wings" for Stability	3- 8	62
Problems of Over-Water Drilling and Production, Latest Designs for New Equipment Described at A.P.I. Meeting—William P. Sterne	3- 8	62
Drilling Firm Building New Submersible Barge—William P. Sterne	3-15	85
Drill Island Nearly Finished	3-15	94
Combine Studies Deep Offshore Drilling	3-29	67
Four Firms Plan Venture in Offshore Area	4- 5	63
When Drilling Rigs Put Out to Sea—John M. Payne	4- 5	102

Unsteady-State Flow in Reservoirs (Part 1) Finding the Diffusivity Equation for Gases—R. F. Nielsen	11-22	113
Unsteady-State Flow in Reservoirs (Part 2) Solving a Special Case of the Diffusivity Equation—R. F. Nielsen	11-29	99
Unsteady-State Flow in Gas Reservoirs (Part 3) Solving a Radial Case of the Diffusivity Equation—R. F. Nielsen	12- 6	131
Unsteady-State Flow in Gas Reservoirs (Part 4) Linear Case with Constant Pressure at Outflow End—R. F. Nielsen	12-13	149
Unsteady-State Flow in Gas Reservoirs (Part 5) Back-Pressure Test on Gas Wells—Dr. R. F. Nielsen	12-20	109

REVIEW OF YEAR'S DEVELOPMENT

Production in '53 as Written and Pictured in Journal Issues	1-25	164

SAFETY

Shell on Head . . . We're Not Dead Is Turtle Club Motto—D. H. Stormont	7-12	78
What Oil Companies Can Do to Reduce Highway Accidents—Stanley Learned	11-15	186

SALES OF PROPERTIES

Arvin Area Wells Sold	1-11	64
Piedmont Oil Co. Sold to Richard King, Jr.	1-18	53
Bonanza Sale Confirmed	1-18	55
Seized Leases on Block in California	2- 8	67
Saint Anne's Buys Neb-Tex	2-15	93
Sapphire Buys Texas Wells	2-15	94
El Paso Purchase Reported	2-15	104
Brundred Properties Sold	2-15	105
Two Firms Buy Acme Stock	2-22	117
Republic Natural Gas Co. Selling Canadian Interests	2-22	125
H. H. Myers Buys Beaumont Properties	3- 8	64
Canadian Oil & Gas Co. Purchases Margo Petroleums Corp.	4- 5	63
Permian Basin Leases Sold to Cabon Carbon and Cicada Oil	5- 3	63
Navajo Leases Offered	5- 3	64
Fullerton Sale Completed	5- 3	75
Oil & Gas Property Management, Inc. Purchases Wells from Floyd L. Karsten & Associates	5-24	135
Price Sells Wells, Leases	6-28	92
Deep Rock Purchases 28 Flowing Wells in Coke County, Texas from F. Kirk Johnson and Associates	7- 5	93
Dorchester Pays Panoma $118,500,000 for 218 Gas Wells, Two Natural-Gasoline Plants in Panhandle, Hugoton Fields	7-12	80
Two Big Deals Closed—General American Buys Deep Rock Facilities and Canadian Southern's Production in Banff Field—Robert J. Enright	7-19	64
Shell Pays $3¼ Million for Block Off Cameron Parish in Highest Bid for Offshore Land Since '48	7-26	136
Hunt Buys Trinity Firms	8- 2	74
Canadian Production Sold to General American Oil Co. of Texas	8- 9	65
Humble Sells Crude System	8- 9	79
General American Oil Co. of Texas Purchases J. K. Hughes Oil Co.	8-30	56
Gibraltar Oil Co. Buys Two Firms	9- 6	62
Marine Oil Co. Sold	9- 6	66
Sinclair May Buy American Republics to the Tune of $108 Million	11- 8	117
Conoco Interested in Buying Kirby Petroleum Co. of Houston	11- 8	117
Nash Buys Production	11-29	54
Proposed Kirby Sale Involves $1 Million Cash	12- 6	81
Fullerton Sale Completed	12-13	89
Husky Buys Clack Stock	12-13	93
Producing Well on Nail and Hendricks Ranches Sold to Howley and Jacobs	12-20	68
Kirby Sale Approved	12-27	109

SECONDARY RECOVERY (General discussions only; also see Pressure Maintenance, Repressuring [Gas], and Water Flooding)

Thermal Recovery Methods Outlined Before A.I.M.E.	2-22	111
Smaller Water-Injection Projects Granted Permits	3- 8	72
The Spraberry Today—J. H. Bartley	4-19	174
Approved Levelland Unit Will Cover 16,000 Acres, 378 Producers, and Operated by Stanolind in 17-Firm Venture	5- 3	62
Gas, Water Input Program Planned for Donnelly Field	5-24	135
500 Secondary-Recovery Projects Active in Texas—Robert J. Enright	5-24	162
T.P.R.C. Aids Texas Operators in Secondary-Recovery Efforts—Dr. George H. Fancher	5-24	210
Big Flood Planned for Sholem Alechem—Ted Armstrong	5-31	47
Pegasus Plan Approved—Robert J. Enright	5-31	54
Atlantic Boosts Recovery with High-Pressure Gas—Robert J. Enright	7- 5	94
L.P.G. Flood Proposed for Camp Hill Field—Robert J. Enright	8-30	56
Secondary Recovery Talks to Highlight Conference	9-20	144
Secondary Recovery in Tijerina Unit Successful (A.I.M.E. Abs.)—N. A. Olansen	10-18	95
"Kerosine Flood" Uses Circulation Process (A.I.M.E. Abs.)—J. Offeringa and C. Van der Pool	10-18	98
In Situ Combustion Field-Tested Again—R. L. Koch, J. F. Gleason, Jr., and W. G. Boston	12- 6	102
New Gages Tested to Aid in Secondary Recovery	12-27	105

SEPARATION (oil, gas, and water)

Separator Sampling of Gas-Condensate Reservoirs—F. O. Reudelhuber	6-21	138
Sampling Lines Tap Separator Shell	10- 4	150
Better Separator Sampling of Crude-Oil Reservoirs—F. O. Reudelhuber	11- 8	181
Split-Stream Testing of Gas-Condensate Wells—W. A. Frier	12-13	137

SPACING, WELL

Wide-Spacing Order Asked for Yellowstone Pool	1-25	108
Temporary Spacing Granted	2- 1	45
Spacing Change Asked	3- 8	70
Spacing Hits Snag	5- 3	77
North Dakota Assigns Spacing Limits to Four Pools	5-10	86
Spacing Ordered for North Dakota But Tioga Decision Delayed	8- 2	63

STATISTICS, PRODUCTION

World Output Drops—Dahl M. Duff	1- 4	57
New Pays Stimulate Hamilton Dome Production—Joseph A. Kornfeld	1-11	84
Creole November Output Up	1-25	118
Production Nears 6½ Million Barrels	1-25	134
U. S. Reserves Show 901-Million-Barrel Gain	1-25	136
World Production Gains 5.1 Per Cent in '53—Dahl M. Duff	1-25	144
Artificial Lift in '54—Joseph A. Kornfeld	1-25	170
World Output Lagging—Dahl M. Duff	2- 1	56
Germany Ranks 18th Among World's Crude Producers	2- 8	72
World Output Rises	3- 8	76
California Production Decreases for First Time in 3 Years—D. H. Stormont	3-29	67
Secondary Stock Decline Tops One Million Barrels	3-29	72
World Output Dips—Dahl M. Duff	4- 5	75
Kansas Retains April Figure as Oklahoma, Louisiana Cut	5- 3	58
World Output Rises—Dahl M. Duff	5- 3	78
Commission Sets 17-Day Schedule for Next Month	5-24	135
Crude Record Broken—Dahl M. Duff	6- 7	80
World Output Skids—Dahl M. Duff	7- 5	107
Stocks Continue Rise	7-12	79
Big Allowable Cut Made	7-26	146
High Inventories Depress Production Slightly—John C. McCaslin	7-26	166
Free-World Production Shows Small Gain—Dahl M. Duff	7-26	170
Production Advances March Along a Broad Front	7-26	177
Free World Output Up	8- 9	81
Coast Output Drops	8-16	103
Foreign Production Up	9- 6	78
World Output Down	10- 4	121
Production Falls Again	11- 8	134
U. S. to Make First Tally of Production Since 1939	11-29	51
World Output Down	12- 6	100
Strippers Are the "Old Men," But They're the Oil Industry's Backbone—Kenneth B. Barnes	12-27	102
Where and How Much Stripper Wells Pumped	12-27	103
World-Wide Oil—Dahl M. Duff	12-27	121
West Germany's Amazing Comeback—Gustav Egloff	12-27	198
Journal Summary of World-Wide Reserves, Production, Refining	12-27	118

SUCKER RODS (see Pumping)

TANKAGE, STORAGE

Ball in Standpipe Shuts Off Tanks	11- 1	104
Simplified Tank-Battery Layout	11- 1	106

TECHNOLOGY TRENDS

Texas' S.R.I. Helps Solve Tough Problems	5-24	180

	Date	Page
TREATING OF OILS		
Redwood Steam Treaters Save Important Money—Ralph W. Hill	9-27	69
UNITIZATION		
SACROC Gets Approval for Water-Gas Injection Program—Paul Swain	1-25	102
Unitization Order Upheld for Elk City	1-25	108
Unitization Power Granted	2- 1	54
Case History . . . Unitization, and Water and Gas Injection, Hackberry Field, Louisiana—R. L. Evans and A. E. Barry	4- 5	112
Stanolind Asks Railroad Commission for Approval of Plan to Unitize Large Portion of 75,000-Acre Levelland Field—Robert J. Enright	4-12	92
Unitized Production Is Economical Production—Ed McGhee	4-12	125
Approved Levelland Unit Will Cover 16,000 Acres, 378 Producers, and Operated by Stanolind in 17-Firm Venture	5- 3	62
Glen Cove Unit Proposed	5- 3	64
Nona Mills Unit Asked	5-31	50
Unitization Plans for Nona Mills and Quien Sabe Approved	6- 7	77
Data Needed for Issuing Field Schedules Outlined	6- 7	79
Honolulu, Standard Oil of California Reach Agreement	6-21	113
Engineering Computations of Participation in Unit Agreements—W. L. Horner	6-21	144
Big Pressure-Maintenance Unit Approved for Parks Field—Robert J. Enright	7-12	81
Treatment Revives Old Wells	9-13	88
Plans for East Long Mott Field Outlined by Quintana	9-27	56
Quintana Unit OK'd	10-11	102
Water Flood Is Proposed for Oklahoma City Field	10-18	83
Adena Unit Planned	10-18	87
West Cement Medrano Unit to Double Oil Recovery (A.I.M.E. Abs.)—A. E. Hall	10-18	95
SACROC Battle Dies—Robert J. Enright	12- 6	89
WATER DISPOSAL		
Automatic Disposal of Salt Water Effected With Float Switch With Built-In Water-Level Control Device—David Walker	3- 8	114
Legislative Plans Drafted by Water Advisory Council	10-18	81
WATER FLOODING		
Filtered Ocean Water Used to Flood Wells in California's Wilmington Field—D. H. Stormont	1- 4	68
Dominguez Flood a State's First Full-Scale Operation	1-11	65
SACROC Awaits Signal for Go Ahead on World's Largest Water Flood	1-18	53
SACROC Gets Approval for Water-Gas Injection—Paul Swain	1-25	102
Pecos Valley Flood Proposed	2- 8	70
Sun Asks Permit to Conduct Limited Flood in Fig Ridge	2-22	121
Atlantic's Imbibition Project in Spraberry Successful—Robert J. Enright	3-29	58
Tex-Harvey Plans Five-Well Project Near Atlantic Pilot	3-29	59
Flood Permits Asked for Six Projects in West and North Texas	4- 5	68
Big Floods Planned for North Ward-Estes Field in Texas	4-12	96
Pecos Flood Gets O.K.	5- 3	63
Johnsons Ask for Flood Extensions	5- 3	63
Fig Ridge Flood Approved	5- 3	64
Pattern for Water Flooding: Flat Rock Promises Secondary Production—C. H. Riggs and J. V. Maude	5- 3	107
Magnolia Asks Permission for Flooding in Pegasus Field—Robert J. Enright	5-10	69
Four Floods Approved—One for Gulf in North Ward-Estes Expected to Recover 11,000,000 Bbl. More Oil	5-17	74
Imbibition—Newest Producing Technique—Robert J. Enright	5-17	104
Water-Flood Tour of Burbank	5-24	126
Commission Sanctions 10 Secondary-Recovery Plans	6-21	111
California Pessimism Fades As Water Floods Take Hold—D. H. Stormont	6-28	77
Manning-Harrington Flood Among Five Projects OK'd	6-28	88
Humble Unit May Expand	6-28	92
Dominguez Scene of First Big Project in California	7-12	79
Hudson & Hudson, Inc., Seeks New Flood	8- 2	73
Pilot Water Flood Automatically Controlled—D. H. Stormont	8- 2	89
"Soap" Washes Oil Out of Sand—H. N. Dunning, Lun Hsiao, and R. T. Johansen	8-16	139
Loudon Project Paying Off As Big Flood Expands—Kenneth B. Barnes	8-30	50
Dry Reservoir Makes Carter Try Unusual Water Supply	9- 6	62
Model Shows How Loudon Water Flood Works (Picture)	9- 6	74
SACROC Flood Begun	9-27	58
Finding Sweep Efficiency in Pattern Floods—Ralph F. Nielsen	10- 4	163
"Kerosine Flood" Uses Circulation Process (A.I.M.E. Abs.)—J. Offeringa and C. Van der Pool	10-18	98
Dutch-Shell's Amsterdam Laboratories Has New Water-Flooding Operation Using Miscible Liquids—Kenneth B. Barnes	10-25	69
SACROC Operating Full-Scale Water Flooding	10-25	79
Humble to Try Conventional Project in Spraberry Field	11- 1	68
Oklahoma's Largest Burbank Floods Promise 180 Million Barrels of Oil—C. H. Riggs	11- 1	88
Pilot Flood Planned	11- 8	126
L.P.G. Flood Approved for Camp Hill	11- 8	129
Welch Flood Sought for the San Andres	11- 8	129
Two Floods Planned for Welch and Lindemann Fields	11-15	168
Emphasis on Water Flooding—Edwin McGhee	11-22	67
Three-Phase Pegasus Plan	11-22	68
Dominguez Flood May Set Pattern—D. H. Stormont	11-29	46
Two Floods Asked for Loving and Cook Counties	11-29	54
How to Use Radioactive Isotopes for Water-Input Profiles—J. M. Edwards and L. E. Holter	11-29	69
Commission's Approval of Gas-Oil Ratio for Water Injection at Diamond "M" Criticized	12-13	96
Pressure-Maintenance Plan for Sandusky Field Sought	12-13	98
Shell's Mobile Unit Takes Laboratory to Water Samples	12-20	61
Kansas Water Flood Pays Off (Picture)	12-20	72

Minimizing Tank Corrosion	7-12	106
Nondestructive Testing Detects Corrosion Damage—F. A. Prange and J. F. Headrick	9-27	82
Hot-Spray Application of Vinyl-Base Paints—B. C. Wright	12-13	145

CORROSION CONTROL (see Pipeline)

COST ESTIMATING

Costs Stabilizing or Declining—W. L. Nelson	1- 4	99
Labor and Material Costs Moving Into Balance	4- 5	132
Refinery Construction Costs Not Changing Significantly	7- 5	148
Increased Wages Threaten to Increase Construction Cost	10- 4	167

COSTS

How to Use Standards to Control Maintenance Costs—E. C. Newton	9-13	126
Savings Through Standardization—C. S. Perkins	11-15	241

CRACKING, CATALYTIC

Operating the Cat Cracker (Part 3) How Conversion Level Affects Product Distribution—J. W. Moorman	1- 4	76
Fifty Per Cent Boost in Gasoline, Distillate—John C. Reidel	2- 1	70
Sinclair's New 40,000-Bbl. F.C.C. Unit—F. Lawrence Resen	2- 8	80
Co Boiler, Fluidized-Bed Steam Superheater . . . Feature Sinclair F.C.C. Plant—O. F. Campbell and N. E. Pennels	2-22	132
Why Did Regenerator Standpipe Get Shorter When It Got Hot?—Dr. D. J. Bergman	2-22	173
Target: 75,000 Bbl. Daily by Midyear—F. Lawrence Resen	2-22	174
Put the Automatic Computer to Work on Your F.C.C. Unit—F. M. Orr	3- 1	87
Model IV Cracker Proves Itself—F. Lawrence Resen	3- 8	64
Operating the Cat Cracker (Part 4) Space Velocity and Catalyst-to-Oil Ratio Together Provide a Measure of Cracking Severity—J. W. Moorman	3- 8	106
What Makes a Good Cat Cracker Feed—E. C. Oden and J. J. Perry	3-22	164
Model IV Cat Cracker Brings Lower Investment, Plus More Efficient Operation to Pan-Am Southern at Destrehan—F. Lawrence Resen	3-22	214
Modern IV Use Spreads	4-12	99
How a Close Check on Your Catalyst Can Improve Fluid Cat Cracker Operation	5- 3	86
Automatic Control Is Doing the Job and Saving Money—P. S. Massey	5- 3	94
Preferential Withdrawal of Catalyst Fines to Reduce F.C.C. Stack Losses—C. A. Seibert, Jr., and D. L. Cleveland	5-31	78
Sun Completes Plans for Large Houdriflow Cracker	6-14	159
How to Turnaround a Cat Cracker—J. C. Reed	6-28	122
Performance Checked, Baffle Loading Improved—G. S. Houghland, E. J. Lemieux, and W. C. Schreiner	7-26	198
Big Model IV Cracker Unveiled	8-23	105
Bypassing Trouble	8-23	145
How Three Companies Handle Fresh Catalyst Addition	9-27	86
1. Cities Service Refining Co., Lake Charles, La.—William E. McFatter	9-27	86
2. Eastern States Petroleum Co., Houston—F. Lawrence Resen	9-27	87
3. Gulf Oil Corp., Port Arthur—F. Lawrence Resen	9-27	90
Pure Oil Adds Octanes With New Model Orthoflow—George Weber	10-18	99
Close Integration, Central Control, and New Ideas in Cat Cracker Instrumentation—L. G. Alexander, J. T. Zeien and Harold Hawkins	11- 1	78
Monolithic Design—D. H. Stormont	11- 8	142

CRACKING, THERMAL

Delayed Coking and Visbreaking	3-22	126
Visbreaking—Still the Basic Process for Fuel Reduction—M. G. Boone and D. F. Ferguson	3-22	166

CRUDES

New Feed Preparation—G. L. Farrar	4- 5	58

DISTILLATION (also see Fractionation)

Vacuum Distillation	3-22	124
Sinclair's Houston Refinery Gets New Crude Unit—F. Lawrence Resen	3-29	106
Where Are We Headed on Fractionating-Absorption Tray Design?		
1. Bubble Caps . . . Rigid Specs and Rising Costs Spur Development Work on This Old Timer—R. M. Young	4-26	152
2. Perforated Plates . . . Properly Designed, These Have a Wide Range of Stable, Efficient Operation—D. C. Lee	4-26	155
3. Recycling Tray . . . Boosts Efficiency Absorption Columns—Edward G. Ragatz	4-26	158
4. Shell Turbogrid . . . Simple Construction, High Capacity, Low Pressure Drop, Economical Maintenance—J. A. Samaniego	4-26	161
5. Float-Valve Bubble Trays—I. E. Nutter	4-26	165
6. Socony Uniflux—V. O. Bowles	4-26	176
7. Gulf's Perforated Plate—A. C. Eld	4-26	180
8. Flexitray—G. C. Thrift	4-26	190
Additional Vacuum Flash Tower Increases Crude-Handling Capacity—F. Lawrence Resen	12-20	88
Experimental Plant Opened	12-20	122

ELECTRICAL (also see related subjects under other headings)

New Electrical Control System for Precipitators Is Revealed	1-25	407
Electronics in Refining Get Better Control, Require Less Start-Up Time—G. L. Farrar	9-27	55

ENGINEERING REFERENCE SECTION (also see Production, Pipeline)

Simplify Your Oil and Gas Calculations—Refrigeration Requirements in Lube Oil Dewaxing—Louis J. Murphy	2- 8	137
Simplify Your Oil and Gas Calculations—Lube Oil Dewaxing Operations—Louis J. Murphy	2-15	179
Simplify Your Oil and Gas Calculations—Refrigeration Requirements in Dewaxing Lubes—Louis J. Murphy	2-22	189
Simplify Your Oil and Gas Calculations—Louis J. Murphy	3- 1	99
How to Size Vapor-Relieving Systems (Part 2)—Joseph Conison	3-15	155
How to Size Vapor-Relieving Systems (Part 3)—Joseph Conison	3-29	123
How to Size Vapor-Relieving Systems (Part 4)—Joseph Conison	4- 5	123
How to Size Relief Valves for Compressed-Gas Containers—F. J. Heller	4-12	159
Relief Valves for Compressed-Gas Containers (Part 2) These Charts Make Calculation Easier—F. J. Heller	5- 3	111
Relief Valves for Compressed-Gas Containers (Part 3) Calculating Ratios for Specific Heats—F. J. Heller	5-24	263

EQUIPMENT DESIGN AND OPERATION (also see Production, Pipeline)

Quick Check on Fractionating-Tower Diameters—R. P. Wheeler	7- 5	145

How to Design In-Tank Jet Mixing Systems (Part 11)	12-20	115

PLANT CONSTRUCTION, NEW REFINERIES

Alby to Build New Asphalt Refinery at Hammond, Ind.	1-18	139
North Dakota Refinery Will Go on Stream in Mid-March	1-25	109
Construction on Schedule for World's Biggest Refinery Job—Dahl M. Duff	1-25	115
First Hyperformer Set by Calstate Refining Co. at Signal Hill—D. H. Stormont	2- 8	69
Ground to Be Broken This Week for Puerto Rico Plant	2-15	111
Development of Brazil's Oil Resources Said Satisfactory	2-15	114
Poly Unit Adds to Italian Expansion	2-15	114
Sunray Begins Work on Coking Unit at Duncan	2-15	209
Williston Basin's Refinery Completion Is Delayed	2-15	209
Great Northern Oil Co.'s Refinery Site Purchased	2-15	210
Great Northern to Open Bids for New Refinery	2-22	237
Construction of Esso's New Hydroformer Set	2-22	237
Lake Charles Refinery Adding New Fluid Hydroformer (Picture)	3- 1	48
Dakota Oil and Refining Co. Plans New Refinery	3- 1	54
Big Kwinana Refinery Going Up	3- 1	61
Asphalt-Blending Plant to Be Completed April 1	3-22	363
New Refinery at Geelong on Stream	4- 5	76
Two Small North Dakota Refineries Near Completion	4-12	184
Canadian Petrofina Plant to Be World's Most Modern	4-26	128
Sun to Officially Open New Sarnia Refinery on May 15	4-26	128
Texaco Adding Nine Units in Big Expansion Program	5-24	279
Fluor Wins Contract for Big Great Northern Plant	6-21	117
Tide Water Eyes Several Sites on Delaware River	7- 5	93
Work Started on Union's Coking Site at Nipomo	7- 5	159
Site Clearing Finished at Shell's New Refinery	7- 5	160
Ferndale Refinery Nearing Completion	7-19	80
General Petroleum Corp.'s New Refinery Near Ferndale Nears Completion	8- 2	64
Ferndale Plant Is Another Step in Northwest's Refining Buildup—D. H. Stormont	8- 9	67
Sunset Eyes Oregon As Site for 20,000-Bbl. Refinery	8-16	164
Sun Announces Large Plant at Marcus Hook	10-18	132
Nitroparaffin Plant Set	10-25	134
The Third Dimension in Engineering—Stanley R. Harris	11- 8	163
South Dakota Chose As Site of 3,000-Bbl. Plant	11-15	165
U. S. Steel to Add to Fast Growth with Utah Facility	11-29	101
Pontiac Eastern to Build Major Mississippi Plant	12-13	96

PLANT EXPANSION

Union Building to Start	1-11	65
Standard Plans Ultraformer	1-11	154
Integrated Platformer, Udex Unit on Stream in Texas	1-11	155
New Plant Planned for Avon	1-18	55
Texaco Plant Contract Let	1-18	59
Riggers Drop Reactor Tower (Picture)	1-18	139
Work Progresses on Shell's Norco Refinery Expansion (Picture)	1-25	112
New Sinclair Cracker One of Nation's Biggest (Picture)	2- 1	52
Kerr-McGee Begins Work at Wynnewood Refinery	2- 1	112
Construction Started on New Ultraforming Unit	2- 1	112
East Coast's First Catformer on Stream (Picture)	2- 8	64
Record Contract Let for Cathodic-Protection Project	2- 8	177
Construction of Platformer for Phillips Petroleum Started	2- 8	177
Work Started on Sunray's New 5,000-Bbl. Platformer	2- 8	177
Engineering Work Started on Great Northern Refinery	2- 8	180
Corpus Christi Completing Refinery Expansion Program	2-15	208
Esso Standard Lets Contract for New Houdriformer Unit	2-15	209
New Reformer Scheduled for Operation by July 1	2-15	210
Largest Platforming, Ethylene Units in World Are Next Additions to 245,000-Bbl. Daily Refinery at Port Arthur	2-22	121
Quaker State Contracts for Two New Platformers	2-22	237
Cities Service's Two New Hydroformers Progressing	2-22	237

The Combustion Gas Turbine in Natural-Gas Transmission (Part 4)—Tracy S. Park, Jr.	6-21	171
The Combustion Gas Turbine in Natural-Gas Transmission (Part 5)—Tracy S. Park, Jr.	6-28	129
How Gas Constants Enter Into Design and Performance (Part 1)—Sherman L. Cole	7-19	119
How Gas Constants Enter Into Design and Performance (Part 2)—Sherman L. Cole	8- 2	107
How Gas Constants Enter Into Design and Performance (Part 3)—Sherman L. Cole	8- 9	121
How Gas Constants Enter Into Design and Performance (Part 4)—Sherman L. Cole	8-30	99
Increasing Pipeline Capacity with Centrifugal Compressors (Part 1)—Harold Woodhouse	9- 6	119
Increasing Pipeline Capacity with Centrifugal Compressors (Part 2)—Harold Woodhouse	10- 4	154
Increasing Pipeline Capacity with Centrifugal Compressors (Part 3)—Harold Woodhouse	10-18	129
Series vs. Parallel Arrangement of Centrifugals for Gas Pipeline Stations (Part 3)—Harold Woodhouse	11-29	89

GATHERING AND STORAGE

Why Storage Tanks Fail—F. J. Felly and M. S. Northrup	2- 1	73
Improved Operation, Lower Costs on Field Gathering System—F. Lawrence Resen	2- 1	90
Colorado Gathering System Planned by Nine Operators	2-15	208
Automatic Control Is Doing the Job and Saving Money—P. S. Massey	5- 3	94
P. D. Meters Check Tank-Table Calculations—O. D. Stallard, Jr., and T. K. Provence, Jr.	9-20	173
Sohio Encountered Unusual Problems in Floating a Tank on a Hilltop—R. S. Kestner	9-20	206
Controlling Unattended Gathering Stations—S. M. Hammer	9-20	250
In-Tank Mixing of Crude Oil—Neil G. Wilson	11- 8	165
New Tank Gager Does Dual Job	11- 8	205
Vapor-Zone Corrosion in Sour-Crude Tanks—A. H. Newberg and J. P. Barrett	11-15	189
Where We Stand on Bulk-Oil Measurement	11-15	193
Tomorrow's Bulk-Oil Measurement	11-15	205
Management's Stake in Bulk-Oil Measurement	11-15	212

INSTRUMENTATION AND CONTROL

Pioneer Products Line Unusual Pressure-Control Methods Feature Steeply Dropping Artery—Gerald L. Farrar	1- 4	101
Instruments, Inc., to Make New Gulf Interface Detector	2-15	97
Automation in the Oil Fields—Kenneth B. Barnes	3- 8	58
How to Achieve Optimum Flow for Minimum Cost—J. W. O'Leary	3-15	147
Air-Operated Controls Point Way to Increased Efficiency at Pump Stations—R. G. Deering	4-12	118
Orifice-Meter Measurement—W. R. Kehoe	4-26	247
Automatic Control Is Doing the Job and Saving Money—P. S. Massey	5- 3	94
Two New Instruments Promise to Improve Accuracy and Economy of Gas Measurement—E. S. Plank	5-10	113
Network Analyzer Solves Flow Problems	5-10	195
Gravity Measurement on Products Line—D. C. Brunton and T. P. Pepper	8-30	79
Interstate's Finney Station . . . Pipeline Instrumentation—1954 Model—Marvin J. Hamilton and Charles F. Barnard	9-20	220
What to Consider in Designing Unattended Pipeline Stations—P. P. Plovanich	9-20	231
Ashland Line Capacity Raised from 16,500 to 30,000 Bbl. Daily—R. F. Delaney and J. E. Brooks	9-20	236
Level-Alarm Controls Aid in Stripping of Tanks—H. L. Daniels	9-20	245
Here's the Way Texas-Empire Achieves Remote Tank Gaging Via 4½-Mile Wire Line—R. G. Deering	9-20	247
Controlling Unattended Gathering Stations—S. M. Hammer	9-20	250
Products Automatically Blended in Line—Paul Reed and R. G. Deering	10- 4	132
Thorough Maintenance, Periodic Testing—Paul L. Hughen	10-18	107
Los Banos: Unusually Designed Automatic Pipeline Station—W. B. Knupp	10-25	98
How Magnolia Meters a 20-In. Crude Stream—J. J. Harris	12- 6	111

MAINTENANCE

Lapping Tool for Overhauling Compressor Cylinders	1- 4	103
Radioactive Pig Tests Line	3- 1	41
Flow Efficiency Comparable to New Pipe—Clinton McClure	4-26	237
Maintenance Welding on Operating H.-P. Gas Lines—H. A. Proctor	5-24	273
Big Cradle Holds Pipe Joint for Rotary Brush and Coater	6-14	101
Silicones—New Tools for Petroleum Operations—F. Lawrence Resen	8- 2	87
Eight Ideas That Saved Money for Interstate Pipeline	8- 2	122
Polaroid Camera Provides Air View of Pipeline Leaks	9-20	146
More Gross Profit with Minimum Investment—Alva C. Smith	9-20	169
Filtering Is Good Business—W. G. Horstman and Ivy M. Parker	11-15	171

MANAGEMENT

Gulf Interstate Counting on Unique Organization to Cut Costs on First Big Fee Gas Pipeline—Paul Reed	1-18	50
Common Carrier Tag Asked for Montana-Dakota Line	4-19	237
T.G.T. Ten Years Later—A Look at 1964 . . . A Forecast—Gardiner Symonds	5-10	96
Want to Be a Better Supervisor?	11-22	81
Sea-Going Pipeliners at Work	11-22	127
This Business of Handling People	12-20	82

OFFSHORE (also see Drilling, Production)

Underwater Oil Line Sought	1-11	146
Humble Asks Permits for Galveston Bay Pipelines	1-25	413
Barite Concrete Is Economical for Pipeline Coating	3- 1	94
World's Longest Submarine Line One-Third Completed	11- 8	125
Record Offshore Line Almost Finished	12-13	95

OPERATIONS, ENGINEERING

Laundry for Pipeline Gas—Raymond C. Baird	1- 4	78
Stop Compressor-Plant Vibration—N. H. Moerke and C. Newman	1-11	100
T.G.T. to Install First of New Turbocharged Compressors (Picture)	1-18	58
When Pipelines Take a Water Route (Part 1)—P. H. Timothy	1-18	105
Here's How Interstate Lines Pipe in Place to Prevent Internal Corrosion—M. B. Grove	1-18	109
Pipelining in '53 as the Advances Were Recorded in the Journal	1-25	168
When Pipelines Take a Water Route (Part 2)—P. H. Timothy	2- 1	86
New Hydraulic Slide Rule Solves Problems in Fluid Flow for Pipeliners—W. L. Kennedy, Jr.	2- 8	103
Electronic Calculator Solves Pipeline Problems—Ernest A. Slade	2- 8	114
Centrifugal Compressor Performance Curves to Pipeline Applications—Harold Woodhouse	2-15	166
Vacuum Jacket Prevents Heaving and Consequent Damage to Building Walls	2-15	174
Here's How to Double Joint Line Pipe	2-15	177
Gulf's Experiences with the Capacitance Recorder in Pipeline Applications—J. D. Jones	3- 1	68
Automatic Welder Makes Aluminum Pipe Practical—F. Lawrence Resen	3-15	79
How to Stop Troublesome Pulsation Without Excess Pressure Drop (Part 1) Clarence N. Taylor	3- 8	101
How to Stop Troublesome Pulsation Without Excess Pressure Drop (Part 2)—Clarence N. Taylor	3-15	113
Two-Cycle Turbocharged Compressors Prove Efficient	3-29	116
New Method for Yard Coating of Pipe	3-29	117
Mobile Tool Benches Speed Maintenance	3-29	117
Plastic Coating a Pipeline Without Lifting the Line	4-12	153
Improved Station Design and Operation—E. S. Murray and R. V. Mertz	5-10	101
Research Vital Part of T.G.T. Operation—O. H. Moore	5-10	104
Shell's Pipeline Blending Unusual New Technique of Mixing 10 Gasoline Components as Product Moves Through Line—Paul Reed	5-17	77
Wanted: An Effective Pulsation Dampener—Eric J. Lindahl	5-17	108
Trans Mountain Oil Line Posed Unusual Preoperation Testing Problems—John H. Topik	5-31	81
The Combustion Gas Turbine in Natural-Gas Transmission (Part 1)—Tracy S. Park, Jr.	5-31	95
The Combustion Gas Turbine in Natural-Gas Transmission (Part 2)—Tracy S. Park, Jr.	6- 7	117
New Weapon Against Corrosion Is Plastic Liners for High-Pressure Pipelines—R. G. Deering	6-14	120
How Good Must Pipeline Coating Be?—L. G. Sharpe	6-14	130
The Combustion Gas Turbine in Natural-Gas Transmission (Part 3)—Tracy S. Park, Jr.	6-14	153
The Combustion Gas Turbine in Natural-Gas Transmission (Part 4)—Tracy S. Park, Jr.	6-21	171
How to Avoid Errors in Gas Measurement	6-21	191
Wafra's Drilling, Development, and Shipping System	6-28	98
Streamlined Internal Cleaning-Coating Operation—F. Lawrence Resen	6-28	112
The Combustion Gas Turbine in Natural-Gas Transmission—Tracy S. Park, Jr.	6-28	129
How Sinclair Prepares Pipeline for Product Service—L. B. Moon	7- 5	137
New Scraper Detector Offers Operational Advantages—Scott E. M. Hood	7- 5	161
Lasting Protection for Products Pipelines—S. Kleinheksel, P. Lawrence, and F. L. Nelson	7-12	94

NATURAL GAS — *Technical Articles on Engineering and Operating Subjects*

	Date	Page
Valve Lifter Saves Time, Improves Safety	7-19	102
How to Reduce Down Time on Compressor Engines—Errol R. Wagner	7-19	136
Simultaneous Flow of Oil and Gas—Ovid Baker	7-26	185
Shell's "Miracle Mile" A New Method of Proving High-Capacity Pipeline Meters—R. E. Speckmann and M. L. Barrett, Jr.	8- 9	84
Where's That Pig?—W. H. Stewart	8-16	122
Oil-Well Packer Solves Gas-Pipeline Problem	8-16	159
Hydrostatic Testing of Large Gas Pipelines—J. S. Powell and N. K. Senatoroff	8-23	132
Welding Aluminum Pipe Automatically—F. Lawrence Resen	8-30	110
Increasing Pipeline Capacity With Centrifugal Compressors (Part 1)—Harold Woodhouse	9- 6	119
Chart of Oil-Flow Analyzer for 6-24 In. Pipelines	9-20	Insert
Chart of Gas-Flow Analyzer	9-20	Insert
Here's a New and Practical Tool . . . The Gas-Flow Analyzer—C. W. Marvin	9-20	152
Oil-Flow Analyzers	9-20	164
P.D. Meters Check Tank-Table Calculations—O. D. Stallard, Jr., and T. K. Provence, Jr.	9-20	173
New Plant Licks Pipeline Gas Problem—A. L. Vaughan and R. B. McLaughlin	9-20	180
Are Ultrasonics Practical for Finding Liquid Accumulation in Gas Lines?—R. G. Deering	9-20	264
Radiographic Inspection of Pipeline Welds—W. W. Thayer	9-20	343
Flow Temperature in a Gas Pipeline—Charles E. Schorre	9-27	66
Products Automatically Blended in Line—Paul Reed and R. G. Deering	10- 4	132
Increasing Pipeline Capacity with Centrifugal Compressors (Part 2)—Harold Woodhouse	10- 4	154
Greater Use Ahead for Gas Turbines—E. C. Clark	10-11	227
Why Balance Initial Pressures in Power Cylinders of 2-Cycle Engines?—V. E. Ford	10-11	228
Increasing Pipeline Capacity with Centrifugal Compressors (Part 3)—Harold Woodhouse	10-18	129
Series vs. Parallel Arrangement of Centrifugals for Gas Pipeline Stations (Part 1)—Harold Woodhouse	11- 1	107
In-Tank Mixing of Crude Oil—Neil G. Wilson	11- 8	165
Northern Natural Gets Centrifugal Compressors	11- 8	171
No Strain in This Strainer Changing	11- 8	203
New Tank Gager Does Dual Job	11- 8	205
Automation Gaining	11-15	157
Filtering Is Good Business—W. G. Horstman and Ivy M. Parker	11-15	171
Calculating Pressure Drop in Oil Pipelines—W. L. Kennedy, Jr.	11-15	232
Series vs. Parallel Arrangement of Centrifugals for Gas Pipeline Stations (Part 2)—Harold Woodhouse	11-15	265
Gulf Experience Affords Valuable Case Study on Pipelining of Highly Viscous Crudes—Morgan Martin	11-29	73
Series vs. Parallel Arrangement of Centrifugals for Gas Pipeline Stations—Harold Woodhouse	11-29	89
"Gun-Barrel" Device Removes Pistons	12- 6	143
What You Should Know About Design of Gas Pipeline Blowdowns—H. A. Altorfer	12-13	126

OPERATIONS, GENERAL

Union Oil Begins Work on New Pumping Station	2- 8	173
Platte Adds Asphalt-Type Crudes to Those Handled	2- 8	173
New Rate Schedules Effective April 1	3- 8	142
Traffic, Revenues Reach New Peaks for Oil Lines	4- 5	158
Oklahoma Refiners to Tap New Markets—Paul Reed	4-19	217
Five-State Loop Will Bring Important Dispatching and Operational Advantages—W. C. McGee and T. K. Davis	5-10	99
Builtin Efficiencies Assure Continued Growth of Natural-Gas Industry—J. J. King	5-10	106
T.G.T. Planes Patrol Line and Move Personnel on Job—Tony Zuma	5-10	116
How Pooling Can Improve Pipeline Efficiency—Paul Reed	5-10	134
Texas Pipelines . . . Over 82,000 Miles of Them—A Story of Achievement—R. G. Deering	5-24	146
How Those Aerial Maps Are Made	5-24	173
Two Lines in a Single River Trench—Jim Crawford	6- 7	92
Yardcoating Pipe on an Automatic Assembly Line—F. Lawrence Resen	6- 7	127
Some Case Histories of Pulsation Mitigation—J. C. Barnhart	6-21	195
Portable Bell Hole for Underwater Pipelining	6-28	143
Cheyenne Refinery to Ship Through Line to Denver	8- 2	62
Photogrammetry—And How It Aids in Pipelining—John H. Mitchell	8- 2	93
Eight Ideas That Saved Money for Interstate Pipeline	8- 2	122
On-Site Revamp	8- 2	126
Cut and Bevel Heavy-Wall Pipe	8- 9	131
Fins Tame Bucking Pipeline	8-30	47
Automatic Pipeline: These Are the Valves and Tanks and These Are the Pumps	8-30	90
Little Inch Proposal Hit by Potential Competitors	9- 6	63
What's New in Products Carriers	9-13	159
This Is Big Year for Pipelines As Products, Crude, Gas Lines Grow—John M. McGivern	9-20	130
Double Shutdown Safeguards Storage—E. H. Parker	9-20	171
Trans Mountain Completing Its First Year—A. F. Terrill	9-20	178
Gulf Interstate Develops an Effective Technique for High-Pressure Air Testing and Cleaning of Its 850-Mile Gas Trunkline—G. E. Foulke	9-20	182
In Constructing 960 Miles of Line This Year, Northern Natural Applies Advanced Pipe-Laying Methods—Paul Reed	9-20	200
Sohio Encountered Unusual Problems in Floating a Tank on a Hilltop—R. S. Kestner	9-20	206
General Motors Develops New X-Type Engine for Pipelines—Eric R. Brater	9-20	249
Varied Drives Take Flow-Line Samples	9-20	293
Quick Solutions to Gas-Flow Problems—T. R. Rhea	9-27	125
Alaskan Products Artery Nears Completion—B. E. Barnes	11- 1	99
Delay in Big Gas Line Cited as Major Factor	11- 8	125
Gagers Get Laboratory and Office on Wheels	11- 8	203
Best Pipeline Is the Straightest One—J. C. Stirling	11-15	217
Rivalry Cuts Costs, Gives Service a New Pipe-Laying Record	11-22	56

SALES OF PROPERTIES

Plains Crude System Sold to Clint Murchison	1-11	146
Texas Eastern Buys Triangle System, Considers Conversion of Little Inch to Products by Addition of New 30-In Line	2-22	113
Franklin County Coal Co. Seeks Purchase of System	3-15	183
Coal Firm Scheduled to Buy Wyoming Crude Line	4-19	247
Interstate Natural to Sell Pipeline Facilities to Olin	5-10	78
Great Lakes Telephone System Purchased by Bell	6- 7	62
Big Heart Pipe Line Co. Buys 175 Miles of Line from Service Pipe Line Co.	6- 7	65
El Paso Natural Ponders Colorado-Western Purchase	8- 2	63
Sunray Buys Pipeline	9- 6	65

STATISTICS

New Gas Financing Reaches Record Volume During 1953	3- 1	122
Gas, Products Lines Nudge Crude Into Secondary Spot	7-26	182
This Is Big Year for Pipelines As Products, Crude, Gas Lines Grow—John M. McGivern	9-20	130
World-Wide Oil—Dahl M. Duff	12-27	121

TERMINALS, LOADING FACILITIES

Check Valve Stops Oil Overflow	3- 1	95
Continental, Skelly, and Mid-Continent Announce Plans to Build Terminals	6- 7	133

Sinclair Nears Completion on 110,000-Bbl. Mine for L.P.G.	6-14	100
Underground Storage for Products, L.P.G. Planned	6-21	111
Anchor Opens L.P.G. Cavern	7- 5	91
L.P.G. Flood Proposed for Camp Hill Field—Robert J. Enright	8-30	56
Sinclair Completing Project for Underground L.P.G. Storage—E. H. Counts and C. L. Childress	8-30	73
How N.C.R.A. Operates Its Underground L.P.G. Storage—G. H. Billue and T. E. Roberts	9-13	111
The "New Look" of L.P.G. Demand—John C. Casper	10-11	109
After 5 Years Excavated Underground Storage Adaptable to All Types of Petroleum Products—R. L. Loofbourow	12- 6	115

PLANT PRACTICES (for complete list see Refining)

What's New in Cooling-Tower-Wood Maintenance—C. L. Blohm, M. Tarplee, and E. C. Smith	1-11	78
Treating Cooling-Tower Lumber to Reduce Fungal Decay—R. H. Bescher	1-11	82
Eliminate Loading Loss by Spray Loading of Tank Cars—W. J. Rodgers	1-11	92
Packaged Compressor Plants—E. S. McRoberts	2- 1	81
Antifreeze for Plant Gas-Supply Line	2-22	180
Manpower, Time Saved in Fighting Fires	3- 1	96
Reef Fields Dual Meter Runs	3- 1	100
How to Size Vapor-Relieving Systems (Part 1)—Joseph Conison	3- 8	119
How to Size Vapor-Relieving Systems (Part 2)—Joseph Conison	3-15	155
How to Size Vapor-Relieving Systems (Part 3)—Joseph Conison	3-29	123
How to Size Vapor-Relieving Systems (Part 4)—Joseph Conison	4- 5	123
How to Size Relief Valves for Compressed-Gas Containers—F. J. Heller	4-12	159
Latent Cooling of Compressors—H. Menard and E. D. Blossom	4-26	231
Relief Valves for Compressed-Gas Containers (Part 2) These Charts Make Calculation Easier—F. J. Heller	5- 3	111
Engine Indicator a Valuable Tool in Maintaining Compressors at Peak Efficiency—Earl Y. Palmer	5-17	102
Coastal Plants Find Ways to Improve Maintenance—F. Lawrence Resen	5-17	116
Relief Valves for Compressed-Gas Containers (Part 3) Calculating Ratio for Specific Heats—F. J. Heller	5-24	263
Treating Cooling Water in Open System—R. W. Kelly	6-14	143
Automatic Treating of Cooling Water—J. T. Russell	7-12	109
Fitting Sulfur Recovery Into Gasoline Plants—R. A. Graff	8-16	130
Pulls Liners Easier	8-23	147
Oil-Leak Hunter	9-20	292
Oil Gage Stops Waste	9-20	293
Wing-Plate Holes Reduce Down Time	9-20	293
Better Sample Cooler	9-20	293
How to Collect a Water-Free Oil Sample	10- 4	146
Special Filter Does Two Jobs—F. Lawrence Resen	10-18	117
New Meter Checks Moisture by Electronics—H. B. Weisbecker	10-18	118
Odds and Ends Make a Pin Puller	10-25	103
Dual Screens Make Cleaning Easier	11-15	259
Pipe Dolly Aids Threading Work	11-15	261
Arresting Reverse Rotation	11-15	261
How to Do a Safer Job of Loading (Part 1)—T. E. Raper	12- 6	137
How to Do a Safer Job of Loading (Part 2)—T. E. Raper	12-13	152

PLANTS, CONSTRUCTION (also see Pressure Maintenance under Production)

Shell Near Completion of Ventura Avenue Expansion	1- 4	112
Gasoline Plant Planned at Manderson, Wyo.	1-11	69
Cities Service Plans New West Texas Cycling Plant	1-11	152
Plant Expansion Progresses at Elk City	1-11	152
Plans for Proposed Dakota Cycling Plant Under Study	1-18	142
Cycling Plant Set for White Flat Pool in East Texas	1-18	142
Texas Pacific to Build New Gasoline Plant Near Hamlin	1-25	415
Construction Started on New Gas Cycling Plant	2-15	212
Sterling Oil's Gasoline Plant to Go On Stream	3- 1	129
Gulf Starts Construction of Natural Gasoline Plant	3- 8	154
Sun to Finish Project at Jameson Plant This Month	3-22	366
Elk City Plant Expansion Work Nearing Completion	4-12	186
Sun Completes Expansion of Natural-Gasoline Plant	4-26	321
Texas Gulf Awards Work for Project Near Odessa	5-10	71
Gasoline Plant Work Begun on Stanolind's Compression-Type Plant	5-31	56
Headlee Plant Near Completion	10-18	81
Adena Plant Authorized	10-18	87
Extraction Plant to Open Near Brush, Colo.	11-15	166

PLANTS, GENERAL

Richfield Starts Expansion of Coles Levee Gasoline Plant	2- 8	183
Gasoline Plant Planned in Weston County Near Clareton, Wyo.	2-22	122
Firm Dismantling Old Natural-Gasoline Plant	3-29	163
Shell Completes Gasoline Expansion	5- 3	75
Texas Gasoline Plant in Operation (Picture)	7-19	75
Gasoline Plant Operating at Big Lake, Tex.	11- 1	69
Tioga Plant Finished—North Dakota's First Natural Gasoline Plant	11- 8	126
Wyoming-Nebraska Pipeline Co.'s Products Line Being Filled	11-15	166

PROCESSING

Phillips Now Handling 250 M.M.s.c.f.d. of Gas at Its Goldsmith Plant—LeRoy Culbertson and Bruce S. Weaver	3- 1	75
Permian's Carbon Dioxide Plant Winds Up Program	3- 1	120
How to Design and Evaluate Absorbers—R. J. Hull and K. Raymond	3-15	159
Frequency-Response Analysis Holds Promise—John E. Barber	4- 5	82
Continuous Analysis of Liquid Plant Streams by Infrared—L. W. Herscher	4- 5	87
Some New Aspects of Cascade Control—C. W. Bowden, Jr., and Harry Hartz	4- 5	92
An Evaluation of Cascade Control Systems—J. G. Ziegler	4- 5	95
Evaluation of New Instruments—W. A. Crawford	4- 5	99
How to Instrument the Fractionation Section in Field Processing Plants—John C. Reidel	4-26	136
Where Are We Headed on Fractionating-Absorption Tray Design?	4-26	152
1. Bubble Caps . . . Rigid Specs and Rising Costs Spur Development Work on This Old Timer—R. M. Young	4-26	152
2. Perforated Plates . . . Properly Designed, These Have a Wide Range of Stable, Efficient Operation—D. C. Lee	4-26	155
3. Recycling Tray . . . Boosts Efficiency Absorption Columns—Edward G. Ragatz	4-26	158
4. Shell Turbogrid . . . Simple Construction, High Capacity, Low Pressure Drop, Economical Maintenance—J. A. Samaniego	4-26	161
5. Float-Valve Bubble Trays—I. E. Nutter	4-26	165
6. Socony Uniflux—V. O. Bowles	4-26	176
7. Gulf's Perforated Plate—A. C. Eld	4-26	180
8. Flexitray—G. C. Thrift	4-26	190
H_2S Removal for $76 Per Million Feet—R. A. Feagan, H. L. Lawler, and M. H. Rahmes	4-26	280
New Texas Plant Unusual on Four Counts	5-24	184
Sohio's Elmore Plant Operation and Maintenance Made Easy—James E. Owens	7-19	105

	Date	Page
Denton's New Natural-Gasoline Plant—D. W. Henwood and C. P. Stanley	10-25	109
Crude-Oil Absorption Clicks With Union—J. A. Gordon	11- 8	172
Gas Gathered from Offshore Locations Will Power and Feed Large Chemical Plants—F. Lawrence Resen	11-22	100
Simplicity, Flexibility, and Economical Operation Is Design of Tennessee Production Co.'s New Plant—R. R. Dean	11-29	77
Shell Expands Ventura Gasoline Plant—Arnold L. Johnson	12-13	142
Condensate Extraction from Lean Gas—L. A. Beecherl, Jr.	12-20	91
REVIEW OF YEAR'S DEVELOPMENTS		
Natural Gasoline in '53 as the Journal Followed Its Progress	1-25	166
SALES OF PROPERTIES		
Gasoline Plant Purchase Planned by Railway Firm	3-29	163
STATISTICS, NATURAL GASOLINE		
Natural-Gas-Liquids Gain Below 11-Year Average—John C. Casper	1-25	148
Gas-Handling Capacity Due for Sharp Rise Petrochemicals Headed for Continued Expansion	1-25	156
November Natural-Gasoline Production Shows Increase	2- 1	119
Continental Oil Contracts Newcastle Area Lease Gas	3- 8	154
Postwar Expansion Exceeds 100 Per Cent—John M. McGivern	4-26	196
Six Million Gallons of Liquids Daily—John M. McGivern	4-26	212
Survey of Field Processing-Plant Construction	4-26	216
What's Happening to Natural-Gas Liquids	7-12	70
Field-Processing Facilities Continue to Expand	7-26	180
Gasoline Taxes Still Climbing—Dahl M. Duff	9-13	89
The "New Look" of L.P.G. Demand—John C. Casper	10-11	109
STORAGE		
Ohio Standard Plans Cavity Storage for Propane at Lima	1-11	152
Lion Oil Co.'s Experience with Underground Storage—W. M. Wilson	3- 1	78
Johnson Gets Contract for Mining L.P.G. Caverns	4- 5	154
Salt-Water Reservoir Lined with Asphalt "Planks"—F. Lawrence Resen	4-12	157
General Gas to Expand L.P.G. Underground Storage	4-12	186
L.P.G. Storage Booming—Paul Swain	6- 7	66
L.P.G. Underground Storage Projects by States	6- 7	67
Sinclair Completing Project for Underground L.P.G. Storage—E. H. Counts and C. L. Childress	8-30	73
How N.C.R.A. Operates Its Underground L.P.G. Storage—G. H. Billue and T. E. Roberts	9-13	111
After 5 Years Excavated Underground Storage Adaptable to All Types of Petroleum Products—R. L. Loofbourow	12- 6	115

Map of Panhandle Eastern Route	6-28	82
Map of Colorado Interstate's Proposed Route	6-28	84
CALIFORNIA		
California Drilling Is Concentrated in the San Joaquin Valley, the Santa Barbara-Ventura Region, and Around Los Angeles	10-11	158
DAKOTA, NORTH AND SOUTH		
Williston Basin Map as of December 31, 1950	4-19	187
Williston Basin Map Showing Locations of Fields Discovered in 1951	4-19	188
Williston Basin Map Showing Locations of Fields Discovered in 1953	4-19	192
Map of Williston Basin Outlining All Fields Discovered During 1951-1953	4-19	193
Subsurface-Structure Contour Map of Williston Basin Mapped on Top of Basement Complex Using Mean Sea-Level Datum Plane	4-19	198
Tioga Structure May	10- 4	127
Wells to 8,500 Ft. in the Beaver-Lodge-Tioga Area Are Now Drilled in 30-35 Days	10-11	156
EASTERN		
Proposed 1,000-Mile Loop of Natural-Gas Pipeline	5-10	100
LOUISIANA		
Map of Route of Southern Natural Project in Marshland and Offshore at the Mississippi River Delta	1-18	106
Completed Interstate System After 3-Year Expansion Program	3-29	64
Producing Fields in the Natchez Area of Southwestern Mississippi and Eastern Louisiana	4-12	144
MISSISSIPPI-ALABAMA		
Producing Fields in the Natchez Area of Southwestern Mississippi and Eastern Louisiana	4-12	144
Structure Map of Church Hill Field, Jefferson County, Mississippi; Contours at 10-Ft. Intervals Are on the Artman Sand	4-12	146
NEVADA		
Rank Wildcat Strike Is That of Shell Oil Co. 55 Miles Southwest of Ely, Nev. The Indicated Discovery Is About Halfway Between California and Utah Production	3- 1	44
NEW MEXICO		
Sketch Map Showing the 5,000,000-Acre Area Discussed in Petroleum Possibilities of Northeast New Mexico	1-11	88
Oil Fields of Southeastern New Mexico	3-29	91
Development Work Is Increasing in the San Juan Basin, Now That a Pipeline Outlet to the Pacific Northwest Is Assured	10-11	157
Probable Area Extent of Raton Basin in Northeastern New Mexico	12-20	84
Areal Distribution Map of Eocene and Cretaceous Formations in Raton Basin	12-20	84
One Possible Interpretation of Pennsylvanian Distribution Within Raton Basin Area	12-20	85
NORTHERN		
Proposed 1,000-Mile Loop of Natural-Gas Pipeline	5-10	100
OKLAHOMA		
Arrow Points to Southwest Exploration Co.'s Important Stratigraphic Test to Be Drilled in Pittsburg County, Southeastern Oklahoma	2-15	218
Fracturing Treatments Are Intensified in the Dotted Portion of This Distribution Map of the Red Fork Sand in Northeastern Oklahoma	2-22	166
Tectonic Map of Oklahoma Showing Regional Position of Northeast Gotebo Field of Kiowa County on the North Flank of Wichita Mountain Uplift	3- 1	89
Produced Gas After Processing Is Injected Along the Upper Limits of the Field and Salt Water Along the Lower Limits so That Recovery Is Effected by Combination Water-Flood and Gas-Cap Expansion	4-12	125
Regional Gravity Map of Texas, Oklahoma, and United States	4-19	Insert
Areas of Different Water Production, and Bartlesville Sand Wells Which Produce Some Extraneous Water, Flat Rock Field	5- 3	109
Leases Most Suitable for Water Flooding in Flat Rock Field	5- 3	109
Successful Wildcatting in the Hugoton Embayment During the Past Few Years Has Uncovered Many New Fields, Particularly in Hansford County, Texas	10-11	168
Summer Weather Seriously Hampers Canadian Drilling as the Muskeg Becomes Nearly Impassable. With the Advent of Winter, Drilling Will Increase	10-11	178
Burbank Area, Osage County, Oklahoma, Showing the Location of Water-Flood Units and the Water-Supply System	11- 1	88
Water-Flood Area of the North Burbank Unit	11- 1	89
ROCKY MOUNTAIN		
The Pioneer Pipe Line Crosses the Great Divide on Its Way from Sinclair, Wyo., to Salt Lake City	1- 4	101
Latest Pay Discovery at Hamilton Dome—the Ordovician—Is Indicated on Field Map	1-11	84
Subsurface Structure Contour Map of Hamilton Dome Prepared on Top of Permian Embar Limestone	1-11	86
Structural Provinces in Wyoming and Neighboring States	4-19	161
Structural Lineaments of Foreland Province of Wyoming and Adjacent Areas	4-19	163
One of the Industry's Major Reserves Is Denver-Julesburg Basin	9- 6	104
Light Rotaries Are Used on The East Side of the Denver-Julesburg Basin to Develop the "D" and "J" Sands	10-11	154
Few Drilling Problems are Present Along the Newcastle Trend of Weston County, Wyo., in the Clareton-Cheyenne River Area	10-11	155
Drilling Conditions Vary Considerably in the Big Horn Basin, Even on the Field Wells	10-11	155
Recent Discoveries (A and B on Above Map) Mean More Drilling for the Sweetgrass Arch of Northwestern Montana	10-11	156
SOUTHEAST		
Fracturing Has Rejuvenated Development Drilling in the Illinois Basin and Well Completions Are up 50 Per Cent Over 1953	10-11	174
TEXAS, GENERAL		
Regional Gravity Map of Texas, Oklahoma, and United States	4-19	Insert
Water Resources and Petrochemical Plants of Texas	5-24	171
Map Showing Flood-Front Development in the Bacon Lime Since 1946	5-24	221
Map Showing Flood-Front Development in the Hill Sand Since 1946	5-24	223
Map Showing Flood-Front Development in the Pittsburgh Sand Since 1946	5-24	223
Texas Fields and Geological Structures	5-24	Insert
EAST TEXAS		
Place-Fix Map Showing Location of Opelika Field in Henderson County, East Texas	5-31	74
Structural Map of Opelika Field Contoured on Top of the Rodessa "H" Porosity. Outline of Gas Unit is Indicated	5-31	75
TEXAS GULF COAST		
Red Fish Bay Oil Field Deflected Holes Were Drilled Outside of the Corpus Christi Ship Channel as Shown on This Oil and Gas-Well Map	2-22	144
A Series of Pipelines Feed Gas, L.P.G., etc., into Dow Chemical Co.'s Freeport Plant	5-24	166
Magnolia Petroleum Co. Soon Will Test a Multimillion Dollar Acreage Located 8 Miles Offshort from Jefferson County, Texas	6-14	104
Part of Texas Gulf Coast Showing Location of South Boling Oil Field	11- 1	93
Boling Piercement-Type Salt Dome Showing Areas of Production and Location of South Boling Field in Relation to Salt Dome	11- 1	94
South Boling Field Contoured on Top of Frio No. 5 Sand	11- 1	94
TEXAS, NORTH		
Gathering System of Bowie Gasoline Co. in Montague County, Tex.	5-24	185
West Burkburnett Field . . . Pilot Flooding on the J. G. Goins Lease	12-20	93
SOUTHWEST TEXAS		
South Texas Activities Is Concentrated Along the Known Trends	10-11	162

	Date	Page
WEST CENTRAL TEXAS		
First Cambrian Production in West Central Texas Was Established at White Flat in June 1953	7-12	91
Downdip Limits of Cambrian Production Were Established by Skelly Oil Co.	7-12	92
WEST TEXAS		
First Reef Example to Employ Center-to-Edge Full-Section Injection Is Salt Creek Field, Kent County, Texas	1- 4	87
Salt Creek Field Lies at the Northern Extremity of a Group of Canyon Reefs Extending Throughout Kent, Scurry, Borden, and Howard Counties, Texas	1- 4	87
Some Changes Were Made in SACROC's Proposed Rules for Water Flooding	1-25	102
Areal Extent of the Spraberry Trend Area Field in the Permian Basin of West Texas	4-19	174
Proposed Unit Area for Pegasus Field	5-10	70
The Elliptical Area at Center Is That Which Has Been Affected by Water Injection to Date in Atlantic's Experimental Spraberry Trend Area	5-17	105
Results of Imbibition are Shown on This Atlantic Refining Map	5-17	106
Deep Ellenburger Production in Andrews and Midland Counties Is Developing Into a Play of Major Proportions and Insures a Bright Future for West Texas	10-11	160

	Date	Page
ALASKA		
Route of the Important Alaskan Products Pipeline Which Will Serve Defense Installations Near Fairbanks	11- 1	99
CANADA		
Canada Drilled 989 Wildcats As Shown Here	4-19	154
FRANCE		
Sedimentary-Basins and Boundaries of Permits Granted or Applied for; Permits Granted to Esso Standard and FROPEX Are Indicated by Shading	12-27	211
Parentis Field Information, and Boundary of Concession Sought by Esso Standard from Government of France	12-27	212
INDIA AND PAKISTAN		
Standard-Vacuum Concessions in Pakistan	10-11	120
NEUTRAL ZONE		
Wafra's Pipeline, 34 Miles Long, Was Completed in Less Than 10 Months	6-28	98
PERU		
Map of the New Concessions in the Northern Part of Peru's Coastal Area	12-27	238

Index of Journal Manuals, Reprints, Maps and Chart

DRILLING AND PRODUCTION

Title	Price
Drilling Engineers Reference Manual	$1.00
Engineering Fundamentals in Modern Rotary Drilling	1.00
Engineering Fundamentals on Petroleum Reservoirs	2.00
Hydraulic Fracturing	1.00
Instrumentation	1.00
Oil Well Pumping Methods	1.00
Production Engineering and Reservoir Mechanics	1.00
Process Techniques for H_2S Extraction-Sulfur Manufacture	1.00
Pumps, Fans and Blowers	1.00
Reference Manual on Electric Logging	1.00
Secondary Recovery	1.00
Water Flooding-Design and Operation	1.00
Water Flooding-Theory and Practice	1.00
1954 Tool Pusher's Reference	.50

NATURAL GASOLINE—FIELD PROCESSING

Fractionation and Absorption for the Process Man	1.00
Heat Transfer—Buthod and Whiteley	1.00
How To Evaluate Film Coefficients for Heat Transfer Calculations	1.50
Instrumentation	1.00
Process Techniques for H_2S Extraction-Sulfur Manufacture	1.00
Pumps, Fans and Blowers	1.00

REFINING

Cost-Imating	2.00
149 Units of the Refiner's Notebook	2.00
Corrosion . . . What To Do About It	1.00
Corrosion and Its Control	1.00
Fractionation and Absorption for the Process Man	1.00
Heat Transfer—Buthod and Whiteley	1.00
How To Evaluate Film of Coefficients for Heat Transfer Calculations	1.50
HOW TO of Refinery Maintenance	2.00
Instrumentation	1.00
New Refiner's Notebook	1.00

REFINING (Continued)

Technical-Engineering Textbooks

FOR YOUR WORKING LIBRARY

Here is your chance to make additions to your library of popular technical texts. These books are not published by The Oil and Gas Journal, but are offered to you through the Reader Service Department. Look the list over, pick out those that you want and send your order on the blank provided.

"OIL PROPERTY VALUATION"
Paul Paine **$4.50**

Discusses oil properties and oil property interests. Covers unproved lands . . . oil and gas reserves . . . elements in valuation . . . valuation methods. Definitions and explanation make this book useful. 204 pages.

"PETROLEUM GEOLOGY"
E. N. Tiratsoo **$7.50**

A world wide survey of oil lands—with facts on their structural and stratigraphic history. Covers all important principles of modern petroleum geology. 449 pages, 122 maps and diagrams, 8 plates, 2 folders. Technology of drilling fluids described.

"ELEMENTS OF OIL RESERVOIR ENGINEERING"
S. J. Pirson **$7.50**

Develops and coordinates the principles which govern the behavior of geological petroleum reservoirs. Includes the concepts of the three fundamental equations of reservoir engineering. 441 pages.

"PETROLEUM REFINERY ENGINEERING"
W. L. Nelson **$10.50**

Gives step-by-step presentation of refining methods—practical details on plant operations. Some of subjects covered are: catalytic cracking, solvent treating, sulfur compounds, ethylene manufacture, additive materials, reboiling, etc., etc. 840 pages, 179 tables, 268 illustrations. 3rd Edition.

"HOW OIL IS FOUND"
Ver Wiebe **$8.50**

Suited to needs of oil operators, lease operators, drilling contractors, tax consultants. Includes seepages, oil rocks, structure, oil accumulation. Describes oil finding techniques fully. 247 pages, 312 illustrations.

"PRACTICAL OIL GEOLOGY"
Hager **$8.00**

New 6th edition. A clear, concise, practical book covering the fundamentals of geology—methods for searching untested areas, selection of sites, application of geology in drilling. This edition carries a section of Veatch's Rule. 589 pages, 227 illustrations, 78 tables.

"STRUCTURAL GEOLOGY OF NORTH AMERICA"
A. J. Eardley **$12.50**

Detailed description of the structural evolution of the North American continent. Double-column pages, 11¼" x 8¼", permit large drawings. Some 750 illustrations and 16 paleotectonic maps in full colors. 620 pages.

"FIELD GEOLOGY"
Frederic H. Lahee (5th edition) **$8.50**

A complete manual for petroleum and mining engineers and geologists. Presents methods and keys for recognition and interpretation of land forms and structures. Valuable new information on air photography and air photogrammetry . . . underground surveying . . . electronic location. 883 pages, 5" x 7", 630 illustrations.

"NORTH AMERICAN PETROLEUM"
Ver Wiebe **$12.00**

A history of oil finding in each of the known oil and gas pools in the U. S. and Canada. With a detailed discussion of the sequence of rocks in each area, emphasizing their thickness and nature. 495 pages—8½" x 11", with 396 maps, graphs, diagrams, etc.

"INTRODUCTION OF GEOPHYSICAL PROSPECTING"
Milton B. Dobrin **$8.00**

A practical treatment of the fundamentals, procedures, uses, and value of all the standard methods of geophysical prospecting. For each method discussed, the book covers basic physical principles, instrumentation, field techniques, reduction and interpretation of field data. 435 pages, 65 illustrations.

"FUNDAMENTALS OF RESERVOIR ENGINEERING"
John C. Calhoun, Jr. **$6.00**

A discussion of the application of engineering principles to various phases of reservoir engineering. Arranged in topical order are such subjects as Reservoir Fluids; Reservoir Rocks and Rock-Fluid Systems; Reservoir Principles—Gas Flow, Drainage and Water Influx; and Well Performance Applications. Collected from a series which appeared in The Oil and Gas Journal. 417 pages, 288 diagrams and graphs.
